in enochomobolajiflourish

As a full-stack web developer with limited experience, I bring a strong grasp of front-end and back-end technologies along with a desire for lifelong learning and problem-solving. I have worked on a few projects both independently and as part of a team. I have developed independent personal projects too. I'm eager to collaborate with a creative team, crafting user-friendly and responsive online applications, while enhancing my web development skills.

WORK EXPERIENCE

Safeer
(August 09, 2023 - Present)
Front-End Developer

I crafted a feature-rich website for Safeer, a prestigious real estate company, using Next.js and Laravel for a dynamic user experience. Collaborated with experts, integrated APIs, and ensured alignment with the company's goals.

Kodatik
(May 26, 2023 - August 01, 2023)
Front-End Developer

I was employed as a front-end developer by the Turkish startup Kodatik to handle the website's design and to build functionalities. I was given tasks and projects to work on, and I primarily used Next.js and laravel to complete these projects.

EDUCATION

Ostim Technical University
computer engineering
